

GSM 600

Data Sheet

Greenbone
Sustainable Resilience

The **Greenbone Security Manager (GSM)** is a Vulnerability Management Solution that integrates seamlessly and transparently into your Security and GRC strategy, providing Vulnerability Assessment, Vulnerability Intelligence and Threat Management capabilities. Identifying breaches of corporate security policy and regulations is covered as well.

With a strong focus on 3rd party integration and open standards, the GSM is a best of breed security solution that enhances and supplements security posture and allows a proactive approach to automated Vulnerability Life Cycle Management.

The **GSM 600** controls sensors for up to 12 security zones and covers up to 6,000 IP addresses. The operational area is large enterprise IT.

Benefits

- Turn-key solution: operational within 10 minutes
- Powerful appliance operating system Greenbone OS with command line administration based on a comprehensive security design
- Integrates the Greenbone Security Feed with over 69,700 Vulnerability Tests that are automatically updated with the newest threat detections routines daily
- Integrated backup, restore, snapshot and GOS-upgrade
- Integrated Greenbone Security Assistant as central web interface
- No limitation on number of target IP addresses (effective number depends on scan pattern and scanned systems)
- Flat rate subscription includes the Platinum Support package, the Greenbone Security Feed and feature updates

Specifications

Dimensions

430 mm x 450 mm x 45 mm

Certification

- CE
- FCC Class A

Environment

- Operating temperature: 0 C° to 45 °C (32 F° to 113 °F)
- Storage temperature: -2 0 C° to 80 °C (- 4 F° to 176 °F)
- Humidity: 10 % - 90 % (non-condensing)

Connectivity

- 6 Port GbE 10/100/1000 Base-TX (copper)
- 2 Port GbE SFP (Copper or Fiber)
- 1 Port serial console RS-232

Construction

- 1U rack mount chassis, heavy-duty steel
- 16x2 character LCD display

GSM 600

Data Sheet

Greenbone
Sustainable Resilience

Supported standards

- Network integration: SMTPS (e-mail), SNMP, SysLog, LDAP, RADIUS, NTP, DHCP, IPv4/IPv6
- Vulnerability detection: CVE, CPE, CVSS, OVAL
- Network scans: WMI, LDAP, HTTP, SMB, SSH, TCP, UDP, etc.
- Policies: IT-Baseline security, PCI-DSS, ISO 27001

Web-Based Interface (HTTPS)

- Scan tasks management with notes and false-positive marking
- Multi-user support
- Clustered and distributed scanning via master-sensor mode
- Report browsing aided by filtering, sorting, annotating and risk scoring
- Plugin framework for reports: XML, PDF, etc.
- Appliance performance overview

Integration/API

- Greenbone Management Protocol (GMP), secured
- All user actions of the web-based interface available via API
- Easy integration with other applications using the API
- Simple automation via command line tools

Administrative console interface

- Network integration configuration
- Backup, restore, snapshot, factory reset, upgrade

Scan-Application

- Scan engine and framework: Greenbone Vulnerability Manager (GVM) with integrated Greenbone Security Feed
- Additional scan tools
