

# Greenbone Enterprise ONE

## Data Sheet

---

**Greenbone**

The **Greenbone Enterprise Appliance** is a vulnerability management solution that integrates seamlessly and transparently into your security strategy, providing vulnerability assessment and threat management capabilities.

It also detects violations of corporate security policies and regulations. With a strong focus on third-party integration and open standards, the Greenbone Enterprise Appliance is a best-in-class security solution that enhances and complements your security posture. Furthermore, it enables automated vulnerability management.

The **Greenbone Enterprise ONE** covers up to 200 IP addresses. The operational areas are small and micro enterprises as well as special use cases such as training and audit-via-laptop.

## Benefits

- Turnkey solution: simple and uncomplicated setup within shortest time
- Powerful appliance operating system Greenbone OS with specially adapted, console-based administration
- Integrated Greenbone Enterprise Feed with more than 100,000 vulnerability tests with daily, automated updates
- Integrated backup, restore, snapshot and GOS upgrade
- Integrated web interface for scan management
- No limitation on number of target IP addresses (effective number depends on scan pattern and scanned systems)
- Subscription includes the Greenbone Enterprise Support, the Greenbone Enterprise Feed and updates

## Specifications

### Hypervisor

The following hypervisors are supported:

- Oracle VirtualBox
- VMware Workstation Pro
- VMware Workstation Player

### System Requirements

- 64 bit Linux OS
- 2 CPUs
- 6 GB RAM
- 16 GB HDD storage

### Connectivity

- 1 virtual Ethernet port

# Greenbone Enterprise ONE

## Data Sheet

### Scan Capacity

- Up to 200 IP addresses in 24 h
- OpenVAS scanner for vulnerability tests and compliance audits
- CVE scanner for prognosis scans

### Supported Standards

- Network integration: SSH, SMTP (e-mail), DHCP, IPv4/IPv6
- Vulnerability classification: CVE and CPE
- Severity classification via CVSS
- Network scans: WMI, LDAP, RADIUS, HTTP, SMB, SSH, TCP, UDP, etc.
- Compliance policies: CIS Benchmarks, IT-Grundschutz, BSI TR-03116 etc.

### Graphical Web Interface

- Managing and starting scan tasks
- Report with filtering, sorting, notes, and risk scoring
- Automated scans through schedules
- Alerts, including on scan completion
- Multi-user support
- Clustering and distributed scanning via master-sensor mode
- Reports as PDF, HTML, text and XML
- Appliance performance overview

### Integration/API

- Greenbone Management Protocol (GMP), encrypted
- All user actions of the web interface available via API
- Easy integration with other applications using the API
- Simple automation via command line tools (CLI)

### Operating System Features

- Network integration and configuration
- Backup, restore, snapshot, factory reset, upgrade
